

So who are these microWatt people anyway?

microWatt is a co-operative group of consulting microelectronic and software engineers. We build custom electronic solutions and also push a few ideas of our own.

microWatt are a small team of highly skilled and passionate designers and engineers with over 30 years of experience in designing electronic hardware & software solutions.

Specialised areas include:-

- * Embedded Systems design
- * Automated information systems for Airports
- * Automated announcement systems
- * Text to speech applications
- * Commercial and private energy monitoring systems
- * Battery & Power Monitoring solutions

Customers include (names you know)

BAA - Gatwick, Heathrow, Stansted
Manchester Airport, Birmingham Airport
Toyota - Derby
Tannoy Audix, M.O.D., British Museum
Windsor Castle - St. Georges Chapel

microWatt has developed
KnoWatt from its work
monitoring the New Eco Houses.

This product is also marketed
under the name of Eddie to
the domestic & industrial market &
'WhatWatts' to the ECO building
industry.
